

NETSECURE AI

Security Compliance Report

Audit Information

Audit ID:	#36	Date / Time:	2026-08-29 19:21:28 UTC
Device Hostname:	live_pan_01.cfg	Vendor:	unknown
Model:	N/A	OS Version:	N/A
Framework:	CIS	Status:	Compliant

Compliance Summary

0%	Critical	10	0	1	9

Compliance Findings & Remediation

#1. CIS-NET-001 — SSH Version 2 Enabled		Severity: HIGH	Status: UNKNOWN
Finding:	SSH version 2 should be used for secure administrative access.		
Current State:	Not observed		
Remediation:	Manual remediation required		
#2. CIS-NET-002 — Telnet Disabled		Severity: CRITICAL	Status: UNKNOWN
Finding:	Telnet should not be enabled for remote administrative access.		
Current State:	Not observed		
Remediation:	Manual remediation required		
#3. CIS-NET-003 — Insecure HTTP Management Disabled		Severity: HIGH	Status: UNKNOWN
Finding:	HTTP administrative access should be disabled.		
Current State:	Not observed		
Remediation:	Manual remediation required		

#4. CIS-NET-004 — Severity: MEDIUM		Status: UNKNOWN
HTTPS Management Enabled		
Finding:	HTTPS should be enabled for secure management access when supported.	
Current State:	Not observed	
Remediation:	Manual remediation required	
#5. CIS-NET-005 — Severity: HIGH		Status: UNKNOWN
Administrative Logging Enabled		
Finding:	Administrative actions should be logged for accountability.	
Current State:	Not observed	
Remediation:	Manual remediation required	
#6. CIS-NET-006 — Severity: MEDIUM		Status: UNKNOWN
Network Time Protocol Configured		
Finding:	NTP should be configured for time synchronization.	
Current State:	Not observed	
Remediation:	Manual remediation required	
#7. CIS-NET-007 — Severity: MEDIUM		Status: UNKNOWN
Administrative Login Timeout Configured		
Finding:	Administrative sessions should have a reasonable timeout.	
Current State:	Not observed	
Remediation:	Manual remediation required	
#8. CIS-NET-008 — Severity: HIGH		Status: UNKNOWN
Secure SNMP Configuration		
Finding:	SNMP should only be considered secure when configured securely.	
Current State:	Not observed	
Remediation:	Manual remediation required	
#9. CIS-NET-009 — Severity: CRITICAL		Status: FAIL
Strong Password Policy		
Finding:	Administrative credentials should follow a strong password policy.	
Current State:	unknown	
Remediation:	Manual remediation required	

#10. CIS-NET-010 — Unrestricted Management ACL		Severity: CRITICAL	Status: UNKNOWN
Finding:	Administrative access should not be unrestricted or dangerous.		
Current State:	[]		
Remediation:	Manual remediation required
